Service & Repair

Avante Patient Monitoring’s tech departments can perform any necessary services or repairs. Our diverse range of specialized tech departments include Patient Monitors, Fetal Monitors, Infusion / Syringe Pumps, Suction Regulators, Patient Modules, and Telemetry. Our biomeds are not just general technicians - they are specifically trained to be masters within their departments. That’s why, with confidence, we offer a 12 month warranty with repairs.
Avante Patient Monitoring provides refurbished medical equipment sales and service unmatched in quality and value. In our 16 years of experience, we have developed the largest catalog of equipment and industry knowledge of any supplier. Whether you choose to service your device or need a like-new refurbished replacement, we have you covered.

CALL TODAY FOR A QUOTE!

800.449.5328
Avante Patient Monitoring (formally, Pacific Medical) provides hospitals and medical facilities worldwide a reliable source for the repair and refurbishment of patient monitoring equipment. Our full service repair depot houses numerous certified engineers working with the latest equipment to ensure each piece of equipment is ready for patient use. We carry an enormous inventory of recertified monitoring equipment for sale along with OEM compatible accessories and parts from all major manufacturers.

About Us

We are a quality-focused, dual ISO organization (9001, 13485), that understands and delivers innovative solutions for the greater good of our customers, who in-turn, ensure the safety of millions of patients world-wide.

Our Mission

We are a quality-focused, dual ISO organization (9001, 13485), that understands and delivers innovative solutions for the greater good of our customers, who in-turn, ensure the safety of millions of patients world-wide.

Avante Patient Monitoring strives to outperform its peers through operational excellence, in accordance with providing a dynamic and challenging environment for employees to excel. Our vision is to continue to strengthen as the recognized industry leader, with the ability to sustain life through reliable medical equipment services.
One Source to Maximize Capital Equipment Performance

Avante Health Solutions is making it easier and more affordable for every hospital, clinic and medical practice to have the very best equipment, supplies and service; therefore doing our part to help providers improve the practice of medicine. You can now find everything you need from one integrated solutions partner. For more information, visit AvanteHS.com.

A Better Total Solution

In today’s healthcare environment you have to stretch your dollar further. That is exactly what our unique company is designed to provide - from unbiased sales of new and refurbished high-quality equipment, to service, parts and repair that is second to none. You can now get everything from one place, and well within budget.
Alaris 8015 PC UNIT Infusion Pump
UIAL2015
The color display clearly communicates critical programming, infusion, monitoring and hospital-defined policy information. The wireless network card provides wireless communication capability between the Alaris System, Alaris Server, and Mobile Systems Manager.

- Standardizations on all Alaris Pumps
- Wireless Options
- Powerful Analytics

Alaris PC Infusion Pump System
We Specialize in all things Alaris Infusion pumps. Contact us today for our full selection.

Alaris 8100 infusion Pump Module
UIAL2100
Designed for the delivery of fluids, medications, blood and blood products using continuous or intermittent delivery for adult, pediatric or neonatal patients.

- Exceptional versatility
- Increased Protection for IV safety
- Simple User Interface

Replacement Parts
Alaris 8100 Infusion Pump Module
Pressure Sensor
TC10009596

Alaris 8110 Syringe Infusion Pump
UIAL2110
It combines precision instrumentation with the safeguards of the Guardrails Suite MX software, helping ensure that the right dose or rate is delivered to your patient.

- Accurate flow rates
- Unique pressure-sensing disc

GE Fetal Transducers

GE Corometrics Nautilus Toco Transducer with Knob
UFCM3205

Corometrics Nautilus Toco Fetal Transducer with Knob can be used with the following monitors: 116, 118, 120 Series, 150, 170 Series. Our line of OEM compatible Fetal Transducers provides a cost savings solution without compromising quality. We also offer NEW compatibles for Hewlett Packard/Agilent/Philips and GE/Corometrics fetal monitors.

GE Corometrics Nautilus Toco Transducer with Wing
UFCM3260

- Standard length 8ft. on all GE Corometrics Transducers

GE Corometrics Nautilus Ultrasound Transducer with Knob
UFCM5205

Fetal Parts

- Philips Avalon M2734A M2735A TOCO M2736A US Smart Transducer Top Case Cover NFPHA9075

- Philips Avalon M2734A M2735A TOCO M2736A US Smart Transducer Cable Assembly NFPHA9020

800.449.5328 • pacmed.com
Philips Fetal Transducers

Philips M2736A Avalon Ultrasound Transducer
UFPH5505

The Avalon FM series fetal and maternal monitors are the first and only to offer automated coincidence detection (cross-channel verification) using Smart Pulse. This innovative feature allows automated maternal pulse detection via the Toco MP transducer without the need to monitor maternal SpO2 or ECG separately.

Philips M2735A Smart Toco+ Transducer
UFPH4505

• Can be used with FM-20, FM-30, FM-40, FM-50 Avalon fetal monitors:

Philips M2734B Smart Toco Transducer
UFPH3505-B

Philips M2725A Wireless Toco Transducer
UFPH3405

Designed to give greater freedom of movement during labor and more choice in birthing positions, it provides the information you need right when you need it:

• Smart cordless transducers are lightweight, waterproof, and provide greater comfort.

We also carry M2726A Ultrasound and M2727A ECG.

Avante Patient Monitoring
Philips M3001A Module Option A01C06
UMPH3106
• Nellcor OxiMax Sp02 and IBP/Temperature

Option A01C18
UMPH3118
• Philips FAST Sp02, IBP/temperature, and 12 lead ECG

Option A02C06
UMPH3206
• Nellcor OxiMax Sp02 and IBP/Temperature

Option A03C06
UMPH3306
• Masimo SET Sp02 and IBP/Temperature

Philips M3001A CO2 Module
UMPH7000
Designed for use by clinicians for adult, pediatric, and neonatal patients in critical and intermediate care areas, in operating rooms and general wards, and for transport inside and outside the hospital.

• A wide variety of Microstream accessories is available for intubated and non-intubated patients.

• Provides a lightweight and rugged package that can be mounted to the patient monitor, or positioned close to the patient to reduce cable.

• Microstream CO2 is a high performance Sidestream CO2 measurement with a very low sample flow rate.
GE Patient Data Module - PDM
UMGE1000

Multi-Measurement Server provides real time waveform and numeric values for the measurements most often used in hospital environments – ECG, respiration, Nellcor SpO2, non-invasive blood pressure, and a port for invasive pressure or temperature.

- Multi-Measurement Server
- Stores patient demographics, and up to eight hours of patient trend data
- One port for conventional mainstream CO2 measurement

---

**Philips M1034A BIS Module**
UMPH1034A

Using Aspect Medical Systems’ XP platform technology, it provides depth of consciousness and sedation monitoring for use in the OR, ICU, and other clinical settings.

**Also check out:**
1. Philips M1006 (A Or B) Module W/ Option To Add Pressure Module
2. Philips M1029A Temperature Module
3. Philips M1012A Cardio Output Module

Avante Patient Monitoring

11
Philips IntelliVue MP50 Patient Monitor
UQPH2150
(Battery) Highly flexible screen configurations; an extensive clinical measurements menu; built-in clinical support tools such as Event Surveillance, conventional diagnostic 12-lead ECG, and arrhythmia analysis; and many other powerful features.

Philips IntelliVue MP70 Patient Monitor
UQPH2170
(No Battery) IntelliVue has a highly flexible screen configuration, an extensive clinical measurements menu, and built-in clinical support tools such as Event Surveillance, conventional diagnostic 12-lead ECG, and multi-lead arrhythmia.

Philips IntelliVue (M8105A) MP5 Patient Monitor
UQPH2105
IntelliVue has a highly flexible screen configuration, an extensive clinical measurements menu, and built-in clinical support tools such as Event Surveillance, conventional diagnostic 12-lead ECG, and multi-lead arrhythmia.

- Wired and wireless networking for continuous connection
- Telemetry as a parameter (TAAP)

Philips HeartStart MRx Monitor/Defibrillator
UQPH6000
The HeartStart MRx Defibrillator/Monitor provides several best-in-class advantages. The longest battery-powered operating time, the largest color display, and fastest time to shock of any monitor/defibrillator.

Zoll M Series Defibrillator
UQZM2201
The M Series features the smallest, lightest, brightest defibrillator unit in its class, which means easy handling and optimal viewing. The built-in AC power and battery charger doesn’t add size or weight.
GE Dash 3000 Patient Monitor
UQGE2330

8.4 inch display, this monitor covers any patient’s monitoring needs in almost every situation. This compact monitor provides users with convenient, easy transportation.
- Lightweight
- 8.4 inch display
- Advanced 7015 software

Philips M3002 X2 Option A01C06 Monitor/Module
UMPH4106
Small in size and large in capacity, offering truly continuous transport across all levels of patient monitoring. Just a single step allows you to unplug and go.
- Dual use for continuity of data
- Improved user interface
- Comprehensive vital signs data
- Wireless telemetry as a parameter

Philips Parts

MP & MX Series Lithium Ion Battery M4605A

X2 Front Display LCD Screen & Bezel Assembly M3002-67021

GE Dash 5000 Patient Monitor
UQGE2350

The GE Dash 5000 is a portable monitoring system that is flexible and easy to use. Advanced clinical parameters including 12SL™ for simultaneous ECG monitoring, GE EK-Pro™ for multi-lead arrhythmia analysis, ICG, mainstream and side stream CO2 and GE DINAMAP® NIBP with Super STAT™.

The palm-sized Philips Intellivue telemetry transmitter series is easy to operate and comfortable to wear, making patient monitoring simple and convenient. These cordless devices simplify caregiving by cutting out clutter and increasing quality of care.

- Uses smart-hopping technology
- Rechargeable Lithium-ion battery
- Out-of range audible alert
- Cellular Wireless Medical Telemetry Service (WMTS)
- Wireless Telemetry as a Parameter (WTAAP)
- FAST-SpO2 (Fourier Artifact Suppression Technology)

The Intellivue MX40 wearable patient monitor gives you technology, intelligent design, and innovative features you expect from Philips – in a device light enough and small enough to be comfortably worn by ambulatory patients.

- Wearable for freedom of movement
- Durable, easy to clean and disinfect
- Alarm management based on your clinical protocols
GE Apex Pro CH Telemetry Transmitter
UTGE2000
ApexPro uses the GE EK-Pro clinical algorithm, which processes and analyzes four independent, simultaneous ECG leads - meeting and exceeding stringent AHA guidelines.

- Dual use for continuity of data
- Improved user interface
- Comprehensive vital signs data
- Wireless telemetry as a parameter

GE Parts
GE ApexPro CH Telemetry Transmitter Case with Overlays & LED Flex Board NTGE9270

GE Apex Pro ECG Telemetry Transmitter
UTGE1000
The flexible design of ApexPro allows each transmitter to monitor only the parameters each patient requires. Continuous monitoring of ECG and SpO2 and episodic monitoring of NIBP and temperature allow caregivers to tailor monitoring according to the patients acuity.

GE Apex Pro FH Telemetry Transmitter
UTGE4000
ApexProTM FH telemetry offers an expansive and scalable telemetry option designed to support large healthcare enterprises. ApexPro FH works seamlessly with CARESCAPETM Enterprise Access. This powerful combination provides a coverage area of up to 1.2 million square feet, enabling you to monitor up to 640 patients across the enterprise.

- Flexible, scalable and reliable
- Enterprise-wide telemetry
- Supports centralized and decentralized monitoring

Avante Patient Monitoring
Ohmeda 1251 Continuous/Intermittent Vacuum Regulator
UROM1600

Offers dual modes to provide the option of an intermittent mode for nasogastric drainage and a continuous mode for tracheal, pharyngeal or surgical suctioning. The unique, patented unilogic module provides a reliable, quiet means of cycling the regulator on and off during intermittent suctioning.

Ohio Push-To-Set 1251 Intermittent Vacuum Regulator (Analog Gauge)
UROH2325

Retains the unique, patented unilogic module which provides a reliable, quiet means of cycling the regulator on and off during intermittent suctioning. It also offers dual modes to provide the option of an intermittent mode for nasogastric drainage or the new CASS procedure and a continuous mode for tracheal, pharyngeal or surgical suctioning. Built-in Patented Push-To-Set™ feature.

Gentec 881VR-300 Continuous/Intermittent Vacuum Regulator
URGN1300

The 881VR Series Continuous/Intermittent (Combo) Suction Regulators provides both continuous regulated suction and intermittent regulated suction. Available in three regulated vacuum ranges: 0-160, 0-200, and 0-300 mmHg.

Philips M1019A G5 Anesthetic Gas Analyzer

UGPH1019

The IntelliVue G5 gas module automatically identifies agents and features mixed agent measurement capability. A fast oxygen measurement based on advanced paramagnetic technology is standard with the G5.

Philips M1026B Anesthetic Gas Analyzer

UGPH1026B

The M1026B Anesthetic Gas Module (AGM) uses infrared absorption technology to measure the five most commonly used anesthetic gases, plus N2O and CO2. Oxygen is measured using a paramagnetic technique.

GE SAM Gas Analyzer

UGGE3000

Provides analysis of respiratory and anesthetic gases when used in conjunction with the GE patient monitors. This compact module provides CO2 waveforms and automatically identifies anesthetic agents and quantification.

Masimo Emma II Capnograph

NGMA3639

Emergency Hand-Held Capnograph is a small portable quantitative capnometer that monitors carbon dioxide concentrations and respiratory rate in one easy to use device.
Bird Small Block Oxygen Blender

This oxygen sensor is available for use with Datex Ohmeda: Aespire, Aestiva 3000, Airsys, Avance, Engstrom Modulus SE7900, Excel 210-7900, Modulus SE1700, S-5, Smart Vent.

We also offer:
- Trianim O2 Blender
- Bird Low Flow O2 Blender

GCX Roll Stands

GCX Roll Stands for devices with post clamp interface. The roll stand can handle many accessories from Cable Cleat to Gas Cylinder.

Oxygen Sensor
